

CONSTRUCTED FACILITY (ELLIPTICAL POLARIZATION)

The WLAX-DT Channel 33 post-auction facility was built-out pursuant to the underlying construction permit (File Number 0000027619). The construction permit does not disclose the antenna polarization to be operated with by the post-auction facility; however, the application for construction permit with which the authorization was based on indicated that the station would operate with horizontal polarization. **It is hereby noted that the WLAX-DT Channel 33 post-auction facility shall operate using Elliptical Polarization** where the Vertical Component incorporates 25% fill and therefore, does not exceed the authorized Horizontal Component (pattern) in any azimuthal direction.

CERTIFICATION

This technical statement was prepared by William T. Godfrey, Jr., Engineering Associate with the firm Kessler and Gehman Associates, Inc. having offices in Gainesville, Florida, and has been working with the firm in the field of radio and television broadcast consulting since 1998.
