

Permittee has vacated Channel 50 and is operating as W36EX-D on Channel 36. Permittee has not been able to obtain and install its new transmitter for Channel 36 because the manufacturer is in Italy and all shipments had been suspended for a time by the COVID-19 pandemic. The station is operating with a temporary transmitter and the power is limited to 85 per cent of authorized power. Otherwise the station is operating normally with its authorized parameters.
