In re: Digital Television Station WACP(TV)  
Facility ID 189358  
LMS License File Number 0000093491  
Operation at Reduced Power

To Whom It May Concern:

Pursuant to 47 CFR §73.1560(d), please accept this notification that WACP(TV) is currently operating at reduced power. WACP's main transmitter was taken out of service for repairs seven days ago on June 25, 2020. WACP is licensed for operation with a transmitter power output of 12.82 kW to achieve the licensed effective radiated power of 34 kW. At present, WACP is operating on a low-power backup transmitter which is capable of 4.8 kW TPO, yielding 12.73 kW ERP.

It is anticipated repairs to the main transmitter will be complete within ten days of this date for a total duration of seventeen days operating at reduced power, thus not exceeding the thirty-day limit beyond which special temporary authority would be required for operating with parameters at variance.

Respectfully submitted,

Jeff DePolo  
Senior Engineer/Managing Member
