

FCC Online Public File

This was licensee's first and remains its only radio station purchase. Licensee did not have FCC counsel and Seller apparently applied for Licensee's FCC FRN at the closing of the transaction in which Licensee purchased station. Licensee never received the password associated with its FRN and was unable to reset that password resulting in licensee being unable to initiate the process by which to upload materials to the online public file. Licensee has now remedied that deficiency and has uploaded all of its local public file materials to the online public file.
