EXPLANATION FOR SILENT STA

It is the Licensee's intent to file to for 3.0 (next gen) authorizations for each of the above referenced stations. As such, the stations were taken silent as of March 23, 2020 while application preparation and submissions are made, negotiations with equipment manufacturers are completed and deliveries are made, and optimized antennas and transmitters are implemented.

Shortly after the initial Silent STA was filed, the COVID-19 Pandemic struck and the ability to obtain the antennas and transmitters has been severely limited. More recently still, the wildfires impacting California, Oregon, Washington and Idaho that have burnt much of areas where these stations tower sites are located now prevent access to these sites due to imposition of "industrial work stops" due to active fires, threat of fires and severely unhealthy air quality.
