### **EXPLANATION FOR SILENT STA**

It is the Licensee's intent to file to for 3.0 (next gen) authorizations for each of the above referenced stations. As such, the stations have been taken silent as of March 23, 2020 while application preparation and submissions are made, negotiations with equipment manufacturers are completed and deliveries are made, and optimized antennas and transmitters are implemented.

Shortly after the initial Silent STA was filed, the COVID-19 Pandemic struck and the ability to obtain the antennas and transmitters has been severely limited.

More recently still, the wildfires that have burnt much of Southern Oregon, Washington and parts of Idaho and Montana now prohibit access to some of Licensees stations and imposition of "industrial work stops" due to active fires, threat of fires and severely unhealthy air quality.
