

**Engineering STA Extension Request  
WNJX-TV (Fac. ID No. 73336)  
Mayaguez, Puerto Rico**

**Engineering STA Extension Request Explanation**

Televiscentro of Puerto Rico, LLC, licensee of station WNJX-TV, Mayaguez, Puerto Rico (Facility ID No. 73336) (the “Station”), hereby requests an extension of Special Temporary Authority (“STA”) so that WNJX-TV may continue operations on its post-auction channel at 116 kW via an interim antenna from its auxiliary antenna site. The Station previously filed and was granted STAs and extensions on December 9, 2019 (File No. 0004343323), June 12, 2019 (File No. 0000074537), December 18, 2018 (File No. 0000064217) and August 3, 2020 (File No. 0000118190).

Because of the damage from Hurricane Maria, extensive modifications to the WNJX-TV tower are needed. Construction at the Station site is complex. Specifically, the Station needs to remove an existing antenna stack before the tower can be reinforced; needs to coordinate with two other stations on the same tower; and the limited space at the construction site requires careful coordination of cranes and other equipment. Since the STA was granted, the ability to schedule a certified tower crew to perform the complex and difficult work has become even more difficult because of the high demand for tower crews that have the necessary equipment due to the increasing number of television stations going through the repack process as well as travel restrictions and stay at home orders issued because of the COVID-19 virus. However, Televiscentro is pleased to report that it has accepted a proposal from a qualified tower crew for the first phase of the work needed for the WNJX-TV tower and the tower company has provided a tentative schedule for the reinforcement work. The tower company has obtained on-site field data and is now preparing drawings. As soon as the drawings are complete and approved, materials will be ordered. Shipping materials to Puerto Rico will require additional time, but at of this time, the tower company has proposed to begin the necessary structural reinforcement in March 2021. Operation via interim antenna is therefore necessary for the Station to remain on the air while the necessary modifications are completed at WNJX-TV’s permanent post-auction site. An STA is in the public interest because it will allow WNJX-TV to remain on the air to broadcast its programming to the public while construction of its permanent facilities is completed.
