

Purpose of Modification Application

The purpose of this instant application for a minor modification of construction permit (File No. 0000027870) (“Original Construction Permit”) is to modify the tower coordinates and Radiation Center Above Mean Sea Level (RCAMSL) for WJWN-TV, San Sebastian, PR (Facility ID No. 58342) as follows:

	<u>Construction Permit</u>	<u>Modification of Construction Permit</u>
Coordinates	18-8-53.1 N 66-58-58.6 W	18-8-51.6 N 66-58-57.1 W
RCAMSL (meters)	933.8	950.9

Pursuant to FCC Staff request, the license to cover application (File No. 0000122653) for WJWN-TV was withdrawn due to noncompliance with 47 C.F.R. § 73.1690(c) because the tower coordinates and RCAMSL differed between WJWN-TV’s Original Construction Permit and license to cover application.

Since the Original Construction Permit was granted on July 25, 2017, the coordinates for WJWN-TV’s tower, ASRN 1237284, were modified by 1.5 degrees longitude and 1.5 degrees latitude by the tower’s owner. Furthermore, as a result of the impact of Hurricanes Maria and Irma on Puerto Rico, the mean sea level of the island has shifted – resulting in a change to WJWN-TV’s RCAMSL by 17.1 meters. No other changes to the technical parameters in WJWN-TV’s Original Construction Permit are being made herein.
