

WSCV(TV)

Exhibit 2

The licensee regularly and timely posts required materials in the station's public inspection file, including political advertising documentation. In certain instances, the political advertising documentation was not posted "immediately," as interpreted by the FCC. The licensee has emphasized the importance of timely posting and has provided additional training to station personnel.

Please note that Station WSCV, as a station in the zone affected by Hurricane Maria in 2017, sought and obtained an extension of time until November 1, 2017, to post its annual EEO public file report, which was due on October 2, 2017 (email communication between Lewis Pulley, FCC, and Angela Ball, NBCUniversal, dated Sept. 22, 2017). That report was posted on October 3, 2017 and was therefore timely.
