

FCC Form 303-S
Online Public Inspection File Certification Exhibit

Station has confirmed that it timely completed each required certification regarding commercial limits on children's programming during the period covered by this FCC Form 303-S. Such certifications were due on a quarterly basis until a recent rule change. In the course of preparing this Form 303-S, Station discovered in a close review of its online public inspection file that the required certification for the first quarter of 2013 was not available in the online public inspection file. Given Station's internal processes and consistent record of uploading its certifications, the Station suspects this certification was timely uploaded to the online public inspection file, but later was inadvertently removed in the course of updating the file following grant of Station's last license renewal. Upon discovering this issue, Station re-uploaded the relevant certification. The Station also will undertake close review to ensure that no files are inadvertently removed in the course of any file updates following final action on the instant license renewal application.

Station has confirmed that its online public file currently contains an up-to-date list of documents, in accordance with 47 C.F.R. § 73.3526(e)(5) (the "Document List"). In the course of preparing this Form 303-S, Station discovered that the entry in the Document List for the credit agreement with Station's parent company did not reflect the company's most recent amended and restated credit agreement. That document was listed on the Station's ownership report filed in January 2020 and therefore was available to the public in the "Ownership Reports" file in Station's online public file. Nonetheless, Station has included this information in this exhibit out of an abundance of caution. Upon discovering this issue, Station promptly updated the Document List. Station has reinforced to its staff the importance of prompt updates to the Document List and is undertaking measures to ensure that amended agreements are promptly reflected on the Document List.
