

**WYBU-CD, Columbus, GA (Fac. Id. 17544)**  
**Renewal Application**  
**Public File Explanation**

WYBU's 2014 4Q issues/programs list was slightly late with an upload date of 1/13/2015. WYBU's 2014 Q4 commercial limits certification and Class A continuing eligibility certification were uploaded January 12, 2015 but that is timely because January 10<sup>th</sup> was a Saturday.

As WYBU began preparing for license renewal, it noted that its 2014 Q1 and Q2 Class A continuing eligibility certifications were missing from the Class A certifications folder in the online public file, which was odd given that other public file uploads in those same quarters were all timely completed. While WYBU continued to research the possible issue, it immediately uploaded the 2014 Q1 and Q2 certifications to the folder on 9/18/2020. Later, WYBU discovered that the 2014 Q1 Class A certification had indeed been timely uploaded to the public file on 4/9/2014 at the "Additional Documents" tab of the FCC Authorizations folder, and remained there, so WYBU relocated it to the proper public file folder. WYBU also later discovered by reviewing its public file "History" that the 2014 Q2 Class A continuing eligibility certification was likely timely uploaded by the 7/10/2014 deadline, but inadvertently deleted and then re-uploaded on 10/7/2014.

WYBU respectfully submits that the slight public file upload delays described above are *de minimis* in nature given its overall public file compliance during the 8-year license term.
