

Public File Certification

The WXGA-TV online public inspection file is now complete, with all items required to be placed in the file by 47 C.F.R. 73.3527, to the licensee's knowledge. However, over the course of the preceding license term, the station failed to upload certain required files in a timely manner. Specifically, station staff failed to upload the issues/programs list for the fourth quarter of 2014 in a timely manner because another issues/programs list had been mislabeled as covering the fourth quarter of 2014 and staff believed that the list already had been uploaded. Additionally, the station failed to upload its repack consumer notice certification within 30 days of transitioning to its post-auction channel. Since discovering these issues, the problem has been corrected and licensee will timely file all subsequent documents to the station's online public file.

Licensee believes that as of the filing of the instant application its online public file is now complete. In making this certification, the licensee has reviewed its public inspection file and has inquired of current employees who are knowledgeable of the contents and maintenance of the licensee's public inspection file. As used in this certification, the phrase "to licensee's knowledge" means licensee's actual knowledge, during the period that the licensee has owned the station, without further investigation other than as described in this exhibit.
