

### Public File Exhibit

In preparing the instant license renewal application, licensee discovered that its 2012-2013 EEO public file report had not been uploaded to the station's online public inspection file, although it had been filed in the station's paper public inspection file. The paper file was damaged in an office flood and, due to lack of available information, the missing EEO report could not be recreated. In addition, licensee discovered that about ten quarterly issues/programs lists were uploaded late.
