

Online Public File Exhibit

In the course of preparing the instant renewal application, licensee reviewed the station's online public inspection file and noticed a few discrepancies. While political advertising documentation was uploaded, licensee discovered that, in the past two years, several political files were uploaded late, many of which were uploaded late due to delays in receiving documentation from political advertisers and a misunderstanding that all documents and copy related to an advertising buy needed to be received before uploading. The station will work to ensure that all political advertising documents are timely uploaded going forward.
