

PUBLIC INSPECTION FILE POLITICAL DOCUMENTS

This year, and in the entire history of the station, there was only one (1) political advertising order for spots run on the station and that one (1) order was not uploaded in a timely manner to the station's online public inspection file. The station has been operated almost completely non-commercial since its existence so this not routine.

The station's operator has now been made aware of the importance of timeliness when placing these materials in the online public inspection and, in the future, will make sure that all political and issues advertising documents will be prepared and timely uploaded to the station's online public inspection file.
