

**RF Exposure Statement
Auxiliary Modification
KSAZ-TV Phoenix, AZ - Channel 10
December 15, 2020**

The facility proposed in this application will have an effective radiated power (ERP) of 38.4 kW and a center of radiation 69 meters above ground level (AGL). An analysis of the radiation levels at 2 meters AGL indicates that the RF exposure level is well below the allowable limit for an uncontrolled area and therefore meets the requirements. All other current safeguards related to the site with regard to both workers and the general public will remain in place.
