

### **Interference Consent**

TVStudy V2.2.5 has determined that the permitted WACS-TV facility having FCC File Number 0000034746 is predicted to cause 4.38% interference to the licensed WXGA-TV facility having FCC File Number 0000113481 which is 3.88% over the allowable threshold. The proposed facility is predicted to cause 4.20% which is 3.70% over the allowable threshold.

WXGA-TV and WACS-TV were both channel 8 in the pre-auction period and were both repacked to channel 7 in the post-auction period. These two facilities have traditionally accepted co-channel interference from each other.

Furthermore, WXGA-TV is owned and operated by the instant applicant and thus hereby accepts the reduction of interference from 4.38% to 4.20%.
