

Auxiliary Antenna Installation Statement
Special Operating Condition or Restriction 6

As part of its filing for the FM auxiliary license to cover application described herein, Applicant respectfully asks that the Commission delete condition #6 of its construction permit authorization. This condition states that measurements must be made with all stations simultaneously utilizing the shared antenna. The antenna proposed is a single station antenna and is not combined with any other station. Although other stations will be licensed to this antenna, this will only be used in an auxiliary situation with only one station at a time.
