

**Auxiliary Antenna Installation Statement
Special Operating Condition or Restriction 4**

As part of its filing for the FM auxiliary license to cover application described herein, Applicant respectfully asks that the Commission delete condition #4 of its construction permit authorization. This condition directs Applicant to notify directional AM radio station WJDX 620 AM (FCC Facility ID 59817) at Jackson, Mississippi of its intent to mount an auxiliary FM antenna within close proximity of the licensed WJDX transmitter location.

In general, this situation could provide for potential re-radiation of the affected directional AM facility, in this instance, WJDX 620 AM. Applicant respectfully asserts that this is not the case in this specific situation.

In June, 2012, Applicant acquired the antenna site described herein, FCC Antenna Structure Registration number 1041136, under its commonly owned real estate management company, HI Management, LLC.

The proposed antenna is an antenna previously used for W225BK (FM Translator for WIIN AM) from Construction Permit BPFT-20140717AAX granted August 27, 2014. The proposed antenna was installed on the tower meeting the requirements listed in the special operating conditions or restrictions of construction permit BPFT-20140717AAX.

Since the initial installation of the antenna, an additional Construction Permit was granted for W296DD and W225BK to be combined and the antenna to be located at a new COR of 128 meters. The original antenna for W225BK was vacated, but left in place on the tower, and a new FM antenna was placed at the top of the tower for W296DD and W225BK. After this was completed and the 2 translators were licensed, it was decided that the unused antenna should be repurposed as an auxiliary antenna for WUSJ, WJKK, WHJT and WYOY.

It is respectfully asserted that the former W225BK auxiliary antenna, previously authorized by the Commission, and subsequent repurposed FM auxiliary antenna for Applicant's use, taken together make moot the requirement to notify WJDX 620 AM of Applicant's intent to construct an auxiliary facility.
