Elkhart, Kansas
Application for Renewal of License
February 2021

Statement re Online Public Inspection File

The licensee has timely prepared issues-programs lists for all quarters of the license term, commencing with the first quarter of 2014. However, since the Commission's Online Public Inspection File went "live" on March 1, 2018, some of the licensee's lists were posted late, due to miscomprehension of the rule requirements and breakdowns of delegation of authority.

The first list uploaded to the OPIF was 2018Q1, uploaded May 22, 2018. On November 1, 2018, 2018Q2 and 2018Q3 were uploaded.

In early 2019, Kanza Society Chief Engineer Chuck Springer stressed to the staff the need to bring the OPIF current with respect to all reports prior to the March 1, 2018, "live" date. Accordingly, on February 21, 2019, lists were uploaded for 2018Q4 and all four quarterly reports for the years 2014-2017.

The 2019Q2 list was timely uploaded on July 5, 2019. A continuing tardiness with the staff led to Mr. Springer's assumption of responsibility on October 1, 2019, for uploading OPIF contents. The 2019Q1 and 2019Q3 reports were subsequently uploaded on October 8, 2019. The 2019Q4 list was timely uploaded on January 10, 2020.

The 2020Q1 list was timely uploaded on June 15, 2020 (pursuant to Public Notice DA 20-353, which extended the deadline to July 10, 2020). The 2020Q2 list was timely uploaded on July 6, 2020.

The licensee is confident that it has in place the procedures and delegations of authority to assure continued compliance with the filing and timeliness requirements of the Commission's rule regarding the Online Public Inspection File.
