

**KYAL, Sapulpa, OK (Fac. Id. 35974)**  
**Renewal Application**  
**Public File Explanation**

Applicant has responded “no” to this certification in an abundance of caution because of two political file uploads in the station public file (Federal - Horn and Lucas). The station never received a request for political ad time from these two candidates. Instead, the political ads ran in a syndicated program without any prior notice to the station. A station employee happened to hear the political ads during the program, immediately reached out to the syndicator to obtain the documents, and for purposes of full disclosure, uploaded them to the public file on the day there were received.

Given its overall compliance with the public file requirements during the term, the station respectfully requests that the two late uploads described above be considered *de minimis* in nature.
