

Online Public File Exhibit

In the course of preparing the instant renewal application, licensee reviewed its online public file and noticed some discrepancies. A handful of EEO reports were not timely migrated from the paper public file to the online public file. While political advertising documentation was uploaded, licensee discovered that, in the past two years, proof of performance documentation was not uploaded immediately and fewer than five political orders were uploaded a few days late. Licensee will work to ensure that all documents are timely uploaded going forward.
