

## K260CT Compliance with Special Operating Conditions

- KSWV experienced a change in base impedance of more than 2 percent of the licensed value due to the addition of the FM antenna. Therefore, a 302-AM application has been prepared and filed with the commission. A copy of that 302-AM is attached to this application.
- The licensee agrees to reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
- This application is being filed in order to commence program test operation.
- Licensee acknowledges that this is an AM revitalization authorization with the listed four-year holding requirement.
