

KKGQ License Renewal Application
Rocking M Media Wichita, LLC
FCC Violations During Prior License Term
Explanation of Circumstances Exhibit

On or about September 23, 2019, without due process of law, the Lessor of the leased studio facilities used by KKGQ took unlawful control of the stations licensed to Rocking M Media Wichita (RMMW) by summarily seizing the broadcasting studios and equipment from which and with which the licensee controlled, operated and programmed several radio stations including KKGQ, *while those stations were on the air* and while they were each being operated legally. The studio Lessor, that day, claiming nonpayment of rent, seized all of the equipment of the Stations which belonged to RMMW, and the Lessor refused RMMW access to the studio facilities, despite the fact that the stations controlled from that studio were transmitting at the time they were taken over by the Lessor. This caused all of the stations to be taken off of the air on September 24, 2019 by RMMW. Upon the eviction by the Lessor from the studio facilities, on advice of undersigned counsel, RMMW turned off all of the subject Wichita area stations including KKGQ because it was impossible to control the transmitters immediately after the eviction from the studios.

KKGQ was returned to the air using licensed parameters on January 16, 2020 and has remained on the air since that time. However, an STA to remain silent was not sought during that silent period due to inadvertence on the part of the station's management. This was explained in detail by the licensee in response to an operational status inquiry by the Audio Division, Media Bureau dated September 24, 2020 (1800B3-VM).
