Ramar Communications, Inc. (“Ramar”), licensee of television translator station K17MN-D, Carlsbad, New Mexico (“Station”), hereby seeks special temporary authority (“STA”) allowing the Station to operate with the facilities proposed in Ramar’s request for minor modification of the Station license, filed with the Commission earlier today, January 27, 2021, LMS File No. 0000132759 (“Application”).

The Application makes clear that its prompt preparation and filing followed the very recent discovery of an inadvertent error in Ramar’s specification of the site of the Station’s licensed transmitting facilities. The Application corrects the error. Grant of the STA requested herein will authorize current operations from the actual transmitter site location until such time as the Application is processed and granted. Such grant, for the maximum permissible length of time, is hereby respectfully requested.
