

## Multiple Ownership Exhibit

The proposed assignee has no other broadcast interests. By the instant transaction, the proposed assignee seeks to acquire two FM and one AM radio stations: KGVE(FM), Grove, OK; KGLC(FM), Miami, OK; and KVIS(AM), Miami, OK. As demonstrated in the attached map created using BIA MediaAccessPro, the contours of all three stations mutually overlap creating one radio market. Pursuant to Section 73.3555(a)(iv), even in the smallest radio markets, a single entity can own or control up to five commercial radio stations, no more than three of which are in the same service, so long as it does not own more than 50% of the stations in the market. As shown on the attached map, there are more than seven radio stations in the market created by the overlap of contours of the stations sought to be commonly owned. Accordingly, the common ownership of the stations proposed herein is permitted.
