

**TECHNICAL EXHIBIT**  
**MINOR MODIFICATION OF CONSTRUCTION PERMIT**  
**W03BU-D/W.C, FCC FILE #0000120326**  
**MIAMI, FL**  
**MINISTERIO OSCAR AGUERO, INC.**

This application requests a minor modification of the above-entitled filing in the following ways:

1. Last minute denial of access to the previously permitted site causes the applicant to move to a new site. Accordingly, this move is to a building at the NUVO Hotel, 1750 NW 107th Ave, Doral, FL 33172. This building has a 20 foot pole atop it which will be used for the antenna array. The installation will be fed from a utility and elevator equipment room below it. The area under and near the pole is unoccupied, being used for mechanical equipment and storage. The licensee will install signage to explain that if employees or contractors enter the area, the licensee will reduce or turn off power to protect all from NIER by calling a local number. Otherwise, NIER is believed to be less than 5% of that for this service.

2. The geographical location of the site is shown on the application; no ASR# is used as this a building with a pole 20' above the roof. The antenna array is rotated 180° from that noted on the CP which is being modified by the within information. The move from the site shown on the CP to the within site is less than 30 miles with near total overlap of the service contours. Additionally, the move from the previous licensed site of the same facility (FID 6044 - W43CB-D) is less than 30 miles with virtually total overlap of the relevant service contours. In all cases, the same market (Miami, FL) is served.

3. Interference study with updated database reveals no unauthorized interference to other licensed or permitted facilities; however, applicant agrees to accept nominal interference amounting to up to 12% from existing facility WMDF-LD.
