FCC Form 2100 – Schedule 303-S
Online Public Inspection File Exhibit

WGSI-CD Online Public Inspection File

During its most recent license term, KLWB-FM (Facility ID No. 3450), Murrells Inlet, SC, did not fully comply with certain online public inspection file (OPIF) requirements as provided in Section 73.3526 of the Commission's rules:[1]

Q1 2017 Issues Programs List. During a routine internal audit of the OPIF by the Licensee, it was discovered that Q1 Issues/Programs list – which had been timely prepared and approved for upload – was not in the OPIF. It was immediately uploaded on May 12, 2017. In addition, concurrent with the upload on that date, the Licensee uploaded a notice acknowledging this and the procedures adopted to prevent future recurrence of the issue.

Q3 2018 Issues Programs List. The report was timely prepared and uploaded on 10/3/2018 but after upload it was determined that the report contained an error. The error was corrected and the modified version was uploaded to the OPIF on 10/23/2018 – the later filing overwrote the timely filing on the 10/3/2018. *A review of the history folder in the OPIF bears this out.* In the unlikely event that this happens again, the Licensee will name the updated report "amended" so that it is clear in the OPIF.
