

## **Environmental Effects**

Educational Media Foundation (“EMF”) certifies that KXRI complies with the maximum permissible radiofrequency electromagnetic exposure limits for controlled and uncontrolled environments.

The RF worksheet in the Instructions to form 303-S was unusable to determine compliance for this facility because the facility is shared with television broadcast facilities. Therefore, EMF used RFHAZ, a commercial software package created by V-Soft Communications, to determine compliance for this site.

Using an ERI “rototiller” EPA Type 3 antenna for calculations, KXRI’s maximum contribution to the site is  $6.14\mu\text{W}/\text{cm}^2$ , which is 3.07% of the worst-case uncontrolled (public) exposure limit of  $200\mu\text{W}/\text{cm}^2$ .

This value does not exceed the 5% “threshold of responsibility” specified in 47 C.F.R. 1.1307(b) and 1.1307(b) (3). Therefore, KXRI is “categorically excluded” from providing an Environmental Assessment.
