

EXPLANATION OF KHFR-LP'S TEMPORARY SILENCE

KHFR-LP's transmitting antenna had been side-mounted on an agricultural silo. On or about March 19, 2020 the silo was demolished, and, as a result, KHFR-LP lost its transmitter and antenna site, and had to leave the air.

The station is currently silent pursuant to a special temporary authorization, File No. BLSTA-20200529AAL, granted July 15, 2020.

The licensee has identified a new transmitter site, and we will be filing an FCC Form 2100 application for a construction permit to make minor changes to KHFR-LP's technical facilities in the coming days.
