

RADIO FREQUENCY RADIATION COMPLIANCE STATEMENT

The Licensed facility, K257EV, has been studied in accordance with the procedures set forth in the FCC OET Bulletin No. 65 "Evaluating Compliance With FCC Guidelines for Human Exposure to Radiofrequency Electromagnetic Fields", Edition 97-01, and has been found to comply with the limits set forth in Section 1.1310 of the Rules. The total exposure due to radiation from the licensed facility as defined by the ANSI standard computations for general population/uncontrolled area is **0.01 %** of the maximum. Since this is less than 5% of the Commission's power density limit, the Licensee is categorically excluded from having to take action to correct for emissions exceeding the guidelines in a site with multiple fixed transmitters. The total radiated power from all TV & FM, full and low power, co-located broadcast emitters were also considered. A summary of the results is tabulated below, and the individual calculations can be found in the following pages.

Multiple Use FM/TV Tower						
Location:		K257EV 257D Sherman, TX				3/7/2021
Channel Frequency Type	Call Letters	Service	ERP (W) H+V	Ant Center of Radiation AG (m)	% of ANSI/FCC Limit (6min)	% of ANSI/FCC Limit (30 min)
99.3	K257EV	LPFM#1	340	91.00	0.01	0.03
Total %					0.01	0.03
IN COMPLIANCE						

The Licensee agrees to maintain full compliance with the safety precautions to workers on the tower (controlled) and the general public (uncontrolled) by reducing or removing radiated power during the time of construction or maintenance on or near the antenna. The Licensee also certifies that it, in coordination with other users of the site, will continue to post RF exposure warning signs and reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from Radiofrequency Electromagnetic exposure in excess of FCC guidelines.

The Licensee is believed to be in full compliance with the Environmental Impact and Commission Rules.
