

FCC Form 303-S
Online Public Inspection File Certification Exhibit

In connection with diligence conducted to prepare this license renewal application, two instances were discovered in which materials were delayed in being uploaded to the Station's online public inspection file.

There was a delay in uploading the Station's issues/program list for the first quarter of 2017 because of personnel issues related to the individual who at the time was responsible for maintaining the Station's online public inspection file. The list was added to the file in July 2017.

The Station has confirmed that its online public inspection file currently contains an up-to-date list of contracts, in accordance with 47 C.F.R. § 73.3526(e)(5). In the course of preparing this Form 303-S, however, it was discovered that the list of contracts reflected an expired network affiliation agreement. Upon discovering this issue, Station promptly corrected it and posted an up-to-date list of contracts to reflect its agreements.

The Station takes seriously its obligations under the FCC's rules, including its online public inspection file requirements. Accordingly, the Station is taking steps to ensure that materials are uploaded to the online public inspection file in accordance with applicable deadlines. In particular, the Station has reviewed the filing requirements of Section 73.3526(e) with outside counsel and Station staff, and it will follow protocols so that up-to-date materials are consistently uploaded by the relevant deadline.
