

Second and Third-Adjacent Interference Statement

The proposed 94 dBu f(50,10) contour falls within the protected contours of 2nd adjacent WPBG, FCC Facility ID # 42114, and 3rd adjacent WZPW, FCC Facility ID # 3464. Both are licensed to Peoria, IL.

The WPBG f(50,50) signal at the proposed site is 99.3 dBu, and the interfering signal is 139.3 dBu. The WZPW f(50,50) signal at the proposed site is 68.4 dBu, and the interfering signal is 108.4 dBu. Therefore, WZPW is the more critical.

At the proposed 250 W ERP, the distance to 108.4 dBu is 422 m. The Google Earth image below shows that there are no residences or major highways within 422 m of the site:

Therefore, the proposal complies with the requirements of 74.1204(d).
