

ENGINEERING EXHIBIT

Application for Minor Modification of Digital Low Power Television Station Construction Permit

prepared for

Gray Television Licensee, LLC
W33DH-D Eau Claire, WI
Facility ID 184506
Ch. 33 15 kW Directional

Gray Television Licensee, LLC (“*Gray*”) is the proposed assignee of unbuilt digital Low Power Television station W33DH-D, Channel 33, Eau Claire WI, Facility ID 184806 (assignment file# 0000139119). W33DH-D is currently authorized to operate pursuant to a Construction Permit (“CP”, file# 0000036215) with 15 kW effective radiated power (“ERP”), directional. *Gray* herein seeks a modification of the CP to specify a different transmitting location and directional antenna.

The proposed facility will employ a new antenna system to be side-mounted on the existing tower structure associated with FCC Antenna Structure Registration number 1033663, located 9.2 km (5.7 miles) from the authorized site. No change to the overall structure height is proposed. The antenna supporting structure is owned by *Gray* and is adjacent to the studio building of *Gray*'s full-service television station WEAU(DT) (Facility ID 7893, Eau Claire WI). The site is located more than 75 miles (121 km) from the reference coordinates of the markets listed in Appendix A of DA 09-1487¹.

The proposed antenna is a Dielectric model TLP-8H/VP having elliptical polarization. The ERP is 15 kW using a “full service” out of channel emission mask. A plot of the directional antenna’s azimuthal pattern is supplied in Figure 1. Figure 2 depicts the 51 dB μ coverage contour of the proposed facility as well as those of the existing W33DH-D authorization (0000036215)

¹“Commencement of Rural, First-come, First-served digital licensing for Low Power Television and TV Translators Beginning August 25, 2009 and Commencement of Nationwide, First-come, First-served Digital Licensing for Low Power Television and TV Translator Services Beginning January 25, 2010,” Public Notice, DA 09-1487, Released June 29, 2009.

and the original CP (file# BNPDTL-20100208ABH) facility, demonstrating compliance with §73.3572 for a minor change.

Interference study per OET Bulletin 69² shows that the proposal complies with the FCC's interference protection requirements toward all digital television, television translator, LPTV, and Class A stations. FCC processing of this proposal is requested using a **1.0 km cell size and 0.2 km terrain profile increment**. The results, summarized in Table 1, show that any new interference does not exceed the FCC's interference limits (0.5 percent to full power and Class A stations, and 2.0 percent to secondary stations) to any facility.

Human Exposure to Radiofrequency Electromagnetic Field (Environmental)

The proposed facility was evaluated for human exposure to RF energy using the procedures outlined in the FCC's OET Bulletin Number 65. Based on OET-65 equation (10) and 25 percent antenna relative field in downward elevations (pattern data shows 25 percent or less relative field at angles 10 to 90 degrees below the antenna), the calculated power density attributable to the proposed facility at locations near the transmitter site at a height of two meters above ground level is $2.4 \mu\text{W/cm}^2$, which is 0.6 percent of the general population / uncontrolled maximum permissible exposure limit. This is well below the five percent threshold limit described in §1.1307(b) regarding sites with multiple emitters, categorically excluding the applicant from responsibility for taking any corrective action in the areas where the proposal's contribution is less than five percent.

The general public will not be exposed to RF levels attributable to the proposal in excess of the FCC's guidelines. RF exposure warning signs will continue to be posted. With respect to worker safety, the applicant will coordinate exposure procedures with all pertinent stations and will reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from RF electromagnetic field exposure in excess of FCC guidelines. This

²FCC Office of Engineering and Technology Bulletin number 69, *Longley-Rice Methodology for Evaluating TV Coverage and Interference*, February 6, 2004 ("OET-69"). This analysis employed the FCC's current "TVStudy" software with the default application processing template settings, 1 km cell size, and 0.2 km terrain increment. Comparisons of various results of this computer program (run on a Mac processor) to the FCCs implementation of TVStudy show excellent correlation.

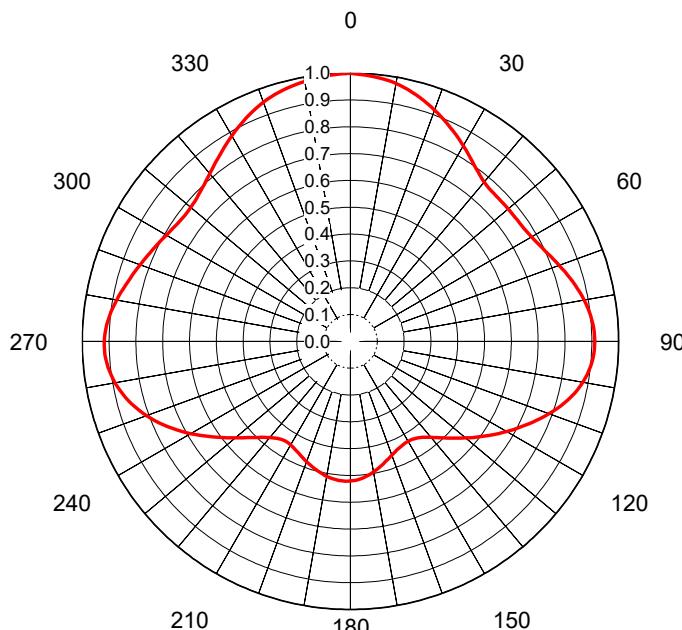

exhibit is limited to the evaluation of exposure to RF electromagnetic field. No increase in structure height is proposed.

Channel and Facility Information	Section	Question	Response
	Facility ID	184506	
	State	Wisconsin	
	City	EAU CLAIRE	
	LPD Channel	33	

Antenna Location Data	Section	Question	Response
	Antenna Structure Registration	Do you have an FCC Antenna Structure Registration (ASR) Number?	Yes
		ASR Number	1033663
	Coordinates (NAD83)	Latitude	44° 48' 00.0" N+
		Longitude	091° 27' 57.0" W-
		Structure Type	TOWER-A free standing or guyed struct
		Overall Structure Height	293.0 meters
		Support Structure Height	270.7 meters
		Ground Elevation (AMSL)	270.9 meters
	Antenna Data	Height of Radiation Center Above Ground Level	131.1 meters
		Height of Radiation Center Above Mean Sea Level	402.0 meters
		Effective Radiated Power	15 kW

Antenna Technical Data	Section	Question	Response
	Antenna Type	Antenna Type	Directional Custom
		Do you have an Antenna ID?	No
		Antenna ID	
	Antenna Manufacturer and Model	Manufacturer:	Dielectric
		Model	TLP-8H/VP
		Rotation	0 degrees
		Electrical Beam Tilt	0.5
		Mechanical Beam Tilt	Not Applicable
		toward azimuth	
		Polarization	Elliptical
	Elevation Radiation Pattern	Does the proposed antenna propose elevation radiation patterns that vary with azimuth for reasons other than the use of mechanical beam tilt?	No
		Uploaded file for elevation antenna (or radiation) pattern data	
		Out-of-Channel Emission Mask:	Full Service

Directional Antenna Relative Field Values (Pre-rotated Pattern)
