

## **PURPOSE OF WEDU MINOR MODIFICATION APPLICATION**

Florida West Coast Public Broadcasting (“FWCPB”) is licensed to operate the WEDU-DT full-service, non-commercial educational broadcast facility on Channel 13 with an Effective Radiated Power (“ERP”) of 25.0 kW using a circularly polarized, nondirectional antenna mounted at 468.6 m Above Ground Level (File No. 0000139567). FWCPB timely filed a maximization application during a filing window (DA 17-1086) on November 28, 2017 that was granted on October 28, 2020 (File No. 0000035808); however, at the time the CP was issued, the WEDU license did not yet reflect that WEDU shared its license with the WEDQ facility. Now that the license has been updated and properly reflects WEDU and WEDQ as a shared license (File No. 0000139567), FWCPB is filing this application so that a CP can be re-issued with the parameters authorized in File No. 0000035808 for the original WEDU maximization and to include the WEDQ channel sharing facility.

## **CERTIFICATION**

This technical statement was prepared by William T. Godfrey, Jr., Engineering Associate with the firm Kessler and Gehman Associates, Inc. having offices in Gainesville, Florida, and has been working with the firm in the field of radio and television broadcast consulting since 1998. Mr. Godfrey was a graduate from the University of North Florida and a Distinguished Military Graduate from the University of Florida.
