

## **Environmental Effects**

Educational Media Foundation (“EMF”) certifies that K215FF complies with the maximum permissible radiofrequency electromagnetic exposure limits for controlled and uncontrolled environments.

The RF worksheet in the Instructions to form 303-S was unusable to determine compliance for this facility because of the “worst-case” nature of the worksheet. Therefore, EMF used RFHAZ, a commercial software package created by V-Soft Communications, to determine compliance for this site.

The facility is located on an existing communications site and is shared with several other broadcast facilities. Using a "Double V" EPA-Type 2 antenna for calculations, EMF's maximum contribution to the site is  $4.68\mu\text{W}/\text{cm}^2$ , which is 2.34% of the worst-case uncontrolled (public) exposure limit of  $200\mu\text{W}/\text{cm}^2$ .

This value falls below the 5% “threshold of responsibility” specified in 47 C.F.R. 1.1307(b) and 1.1307(b) (3). Therefore, K215FF is “categorically excluded” from providing an Environmental Assessment.
