### Resumption of Operations

The above reference facility owned by West Virginia Educational Broadcasting Authority (WVEBA) went silent April 6, 2021 due to a catastrophic transmitter failure. W41DK/W16DT is currently licensed on channel 41 and permitted on channel 16. In an attempt to retune the transmitter from channel 41 to 16, irreparable damage was caused to the transmitter. While in silent operation, WVEBA procured a suitable transmitter capable of providing the construction permitted channel 16 operation. The channel 16 construction permitted antenna has not be procured yet and thus it is hereby requested to resume operations pursuant to the STA having FCC File number 0000116720<sup>1</sup>

The instant application is in the public interest by enabling W41DK/W16DT to return to the authorized STA operations while the construction permitted facility is being built out.

Sincerely,

A handwritten signature in blue ink that reads 'Ryan Wilhour'.
