re: Public Inspection File requirements

Our EEO annual report due on June 1, 2020 did not get filed timely. Our EEO compliance person was out of the station due to Covid-19. The filing date passed and it was mistakenly overlooked.

It was corrected on April 21, 2021.

To address this failure we have taken the following step. Our staff fluctuates between four and five people. We have assigned a second person to monitor EEO filing deadlines in the event our EEO compliance person is not available.
