

Online Public File Exhibit

In the course of preparing the instant renewal application, licensee reviewed its online public file and noticed some discrepancies. Due to a clerical error while working remotely during the pandemic, the 2019-2020 EEO annual report was not timely uploaded to the public file, though it was available at all relevant times on the station's website. While political advertising orders were uploaded substantially timely, documentation of the exact times that political spots actually ran was not uploaded after the schedules were completed but has now been uploaded. Also, two quarterly issues/programs lists were uploaded late, including one that was uploaded one day after it was due. Licensee will work to ensure that all documents are timely uploaded going forward.
