

FCC Form 303-S
Public Inspection File

WQHS-DT, Cleveland, OH (the “Station”) believes that it has generally met the requirement in Section 73.3526 of the FCC rules to upload documentation required to the online public inspection file by the applicable deadline. In an abundance of caution, the Station reports the following information:

- Following the 2013 government shut down, the Station inadvertently failed to post its 3rd quarter 2013 Children’s Television Commercial Limit Certification to its public inspection file by the special new filing date established by the Commission, October 28, 2013. It posted that certification on January 7, 2014. The Station also prepared the 4th quarter 2013 Children’s Television Commercial Limit Certification in a timely manner, but inadvertently failed to post the certification to its public inspection file until April 10, 2014 when the error was discovered.
- The Station completed its 3rd quarter 2014 issues/program list in a timely manner, but inadvertently failed to post that report to its public inspection file until October 15, 2014, when the error was discovered.
