

ONLINE PUBLIC INSPECTION FILE DOCUMENTS

All required documents were placed in the Online Public Inspection File in a timely manner except as noted below:

The Licensee has placed all Programs/Issues Quarterly Reports into the file in a timely manner. However, during the 2020 political season, there were orders for political advertisers during that period whose orders or updates were not completely uploaded in a timely manner to the Station's Online Public Inspection File. All items required to be in the Online Public Inspection File are now in the file.

The Licensee and its operators and employees are now very aware of the importance of the necessity for timeliness when placing these political materials in the Online Public Inspection File and, in the future, will make sure that all political advertising documents will be properly prepared and uploaded in a timely manner.
