

BASIS FOR REQUESTED ENGINEERING STA

Entravision Holdings, LLC (“Entravision”), the licensee of Station KPMR, Santa Barbara, California (FIN: 12144) is requesting Special Temporary Authority to undertake operations of the Station, on a low power basis, pending reconstruction of its transmission facility.

On May 27, 2021, the antenna supporting structure suffered a major calamity. The structure came down and, as a result, can no longer serve KPMR as its tower site.

Entravision is now planning to undertake a reconstruction of the transmission facility. However, pending what may be a significant period of time, as the transmitter site is located on federal land, Entravision seeks to operate the Station using low-power facilities that can be promptly put into service.

In order to enable Entravision to continue to serve the viewing public in the Santa Barbara television market, it requests that this engineering STA be granted to KPMR.
