

## **BASIS FOR REQUESTED ENGINEERING STA**

KJLA, LLC (“KJLA”), the licensee of Station KSGA-LD, San Bernardino, California (FIN: 5342) is requesting Special Temporary Authority to undertake operations of the Station with facilities at variance with its construction permit.

The Station has been off-air for nearly a year as it works to construct a new displacement station in a channel sharing arrangement.

KJLA has been unable to complete all construction and channel sharing arrangements, but wishes to return to operations within one year of going silent.

It now wishes to place the Station on air, and serving the public, with facilities at variance with its permit.

KJLA is continuing to work on permanent facilities but wishes to be able to provide KSGA-LD’s broadcast service to the public.

In order to enable KJLA to continue to serve the viewing public and the public interest in the Los Angeles television market, it requests that this engineering STA be granted to KSGA-LD..
