

ENGINEERING EXHIBIT

Digital Class A Television Station Application for Minor Modification of Licensed Facility

prepared for

Gray Television Licensee, LLC
WOHZ-CD Mansfield, OH
Facility ID 41892
Ch. 20 15 kW Directional

Gray Television Licensee, LLC (“*Gray*”) is the licensee of Class A television station WOHZ-CD, Channel 20, Facility ID 41892, Mansfield OH. WOHZ-CD is licensed to operate (file# 0000146999) with 4 kW effective radiated power (“ERP”), directional. *Gray* herein seeks a minor modification Construction Permit to relocate WOHZ-CD, increase ERP to 15 kW, increase antenna height, and use a different directional antenna.

The proposed WOHZ-CD facility will employ a new antenna to be side-mounted on the existing tower structure associated with FCC Antenna Structure Registration number 1015774, located 41.6 km (25.8 miles) from the licensed site. No change to the overall structure height is proposed.

The proposed antenna is a Dielectric model TLP-8F/VP-R having elliptical polarization. The ERP is 15 kW directional using a “full service” out of channel emission mask. A plot of the directional antenna’s azimuthal pattern is supplied in Figure 1. Figure 2 depicts the coverage contour of the proposed facility as well as that of the licensed facility. The service area overlap demonstrates compliance with §73.3572 for a minor change.

Interference study per OET Bulletin 69¹ shows that the proposal complies with the FCC’s interference protection requirements toward all digital television, television translator, LPTV, and

¹FCC Office of Engineering and Technology Bulletin number 69, *Longley-Rice Methodology for Evaluating TV Coverage and Interference*, February 6, 2004 (“OET-69”). This analysis employed the FCC’s current “TVStudy” software with the default application processing template settings, 1 km cell size, and 0.1 km terrain increment. Comparisons of various results of this computer program (run on a Mac processor) to the FCCs implementation of

Class A stations. FCC processing of this proposal is requested using a 1.0 km cell size and 0.1 km terrain profile increment. The results, summarized in Table 1, show that any new interference does not exceed the FCC's interference limits (0.5 percent to full power and Class A stations, and 2.0 percent to secondary stations) to any facility.

The site is located 129 km from the U.S. – Canada border. For Canada referral purposes, the 24.3 dB μ F(50,10) contour is relevant for digital Class A operations on Channel 20. The proposed WOHZ-CD 24.3 dB μ F(50,10) contour is depicted in Figure 3 and does not reach Canada. Thus, international coordination is not required.

Human Exposure to Radiofrequency Electromagnetic Field

The proposed operation was evaluated for human exposure to RF energy using the procedures outlined in the FCC's OET Bulletin Number 65. Based on OET-65 equation (10), and considering 25 percent antenna relative field in downward elevations (pattern data shows less than 25 percent relative field at angles 15 to 90 degrees below the antenna), the calculated signal density near the antenna at two meters above ground level attributable to the proposed facility is $0.9 \mu\text{W/cm}^2$, which is 0.3 percent of the general population/uncontrolled maximum permitted exposure limit. No other television or radio broadcast facilities are authorized within sufficient distance to be a significant contributor to RF exposure at this location.

The general public will not be exposed to RF levels attributable to the proposal in excess of the FCC's guidelines. RF exposure warning signs will be posted. With respect to worker safety, the applicant will coordinate exposure procedures with all pertinent stations and will reduce power or cease operation as necessary to protect persons having access to the site, structure, or antenna from RF electromagnetic field exposure in excess of FCC guidelines. Environmental matters covered by this exhibit are limited to the evaluation of exposure to RF electromagnetic field.

Channel and Facility Information	Section	Question	Response
	Proposed Community of License	Facility ID	41892
		State	Ohio
		City	MANSFIELD
		DCA Channel	20
		Designated Market Area	Cleveland-Akron (Canton)

Antenna Location Data	Section	Question	Response
	Antenna Structure Registration	Do you have an FCC Antenna Structure Registration (ASR) Number?	Yes
		ASR Number	1015774
	Coordinates (NAD83)	Latitude	40° 53' 24.0" N+
		Longitude	081° 16' 11.0" W-
		Structure Type	TOWER-A free standing or guyed struct
	Overall Structure Height	238.7 meters	
	Support Structure Height	238.0 meters	
	Ground Elevation (AMSL)	385.8 meters	
	Antenna Data	Height of Radiation Center Above Ground Level	219.5 meters
		Height of Radiation Center Above Mean Sea Level	605.3 meters
		Effective Radiated Power	15 kW

Antenna Technical Data	Section	Question	Response
	Antenna Type	Antenna Type	Directional Custom
		Do you have an Antenna ID?	No
		Antenna ID	
	Antenna Manufacturer and Model	Manufacturer:	Dielectric
		Model	TLP-8F/VP-R
		Rotation	220 degrees
		Electrical Beam Tilt	1.0
		Mechanical Beam Tilt	Not Applicable
		toward azimuth	
		Polarization	Elliptical
	Elevation Radiation Pattern	Does the proposed antenna propose elevation radiation patterns that vary with azimuth for reasons other than the use of mechanical beam tilt?	No
		Uploaded file for elevation antenna (or radiation) pattern data	
		Out-of-Channel Emission Mask:	Full Service
