

Compliance with Special Operating Conditions
Translator K285HC Facility ID 200824
Corsicana, Texas

The Construction Permit for K285HC, Facility ID 200824, Corsicana, Texas contains conditions that must be met in order to comply with the operating conditions attached to the Construction Permit, FCC File No. 0000129701.

1. The translator antenna is mounted on the AM tower for KAND(AM), Facility ID 13968, the transmission line to the translator antenna is bonded to the tower and an isocoupler is mounted at the base of the tower to isolate the translator feed system. Tower impedance measurements were made both before and after the translator antenna was mounted on the AM tower and the applicant found that the tower impedance change was substantially less than 2%. Since the tower impedance change is less than 2%, the applicant is not required to file a direct power measurement request on FCC Form 302-AM. The installation is in full compliance with Condition 1 on the Construction Permit.
2. The applicant understands that this translator was granted under the provisions of the AM Revitalization proceeding. It is not authorized to re-transmit any other facility and the translator license is forever attached to the KAND(AM) facility.
3. The applicant is aware that the translator is not authorized to commence operation until a license application is on file with the FCC.
4. The applicant is aware that the Construction Permit for this facility was extended in accordance with Public Notice DA 20-1059 for an additional 6 months and that its expiration date is July 11, 2021.
