KOFH

Facility ID # 21291

Explanation of Silent Period

KOFH was silent from December 16, 2016 through January 25, 2017. This was due to a brush fire that started in an adjacent property and spread to the transmitter site. On January 10, 2017, KOFH was granted an STA (BSTA-20170109ABL) to operate an emergency facility on reduced power. On September 25, 2017, KOFH was granted a construction permit to modify their facility to a different location in preparation for full power operations (See BPH-20170925AEA, modified on BMPH-20190424ABA). On November 14, 2019, KOFH covered the construction permit (File No. 0000089638, granted Nov 27, 2019) and has been operating on that licensed facility since then with no further interruptions.

Public File

KOFH is aware that they are deficient in updating the public file with most of the issues lists missing. The issue can be attributed to an internal dispute with an ex-employee of the station. KOFH has been consulted by Michelle Bradley, CBT at REC Networks on the regulations and the expectation of full-service broadcast licensees to maintain their online public inspection files as one of the obligations of broadcasting in the public interest.

Ownership Reports

Due to the complications that KOFH has experienced over the years with staffing, the station is aware that no ownership reports have been filed. This issue was addressed to them by Michelle Bradley, CBT at REC Networks. Subsequent to this renewal filing, KOFH will file an ownership report in order to be "current" and have been advised of their responsibility to file a biennial ownership report again when they are due on December 1, 2021.
