

**Engineering Statement
Displacement Application
K29AB Monterey, CA
Channel 30**

K29AB is currently licensed to operate on channel 29 and is being displaced due to the now concluded Incentive Auction and the resulting spectrum repacking. K29AB will receive significant new interference when Class A station KMMD-CD repacks from channel 39 to channel 28 in Phase 2.

K29AB proposes in this application to relocate to channel 30 and convert to digital at its current site utilizing the same antenna pattern. The proposed facility will not cause any new interference to other stations beyond the de minimis limit. A copy of the TVStudy interference analysis showing compliance is attached.
