

Digital LPTV Station W45CL-D Silent Status

On or around December 27, 2019, the modulator for the station's transmitter took a power hit and failed and the licensee was forced to take the station silent (see LMS File No. [0000095664](#)). An application for extension of silent STA was filed in July of 2020 (see LMS File No. [0000117002](#)) and amended on January 7, 2021 to request a 312(g) waiver of the one year silent period. W45CL-D was displaced to Channel 26 (see LMS File No. [0000054169](#)). A license to cover the displacement construction permit was filed and granted on May 4, 2021 (see LMS File No. [0000144443](#)).
