

Technical Certification

This minor modification of license provides notification that the antenna has been replaced with a new model on the same location on the tower as of June 24, 2021. This action complies with the provisions of Sections 73.203, 73.207, 73.213, 73.315, 73.509, 73.515, 73.525, and 73.1125. The new antenna, which has two more bays than the previous version allows KFBG to reduce transmitter power from 30 kW to 26.5 kW while staying within the contours based on the parameters included on the license.
