**Re: K38NR-D, Alexandria, LA
K45IM-D, Monroe, LA
Facility ID Number: 189745 and
70101**

Dear Ms. Kreisman,

Developers and Managers Group, LLC ("Developers") requests relief from the Commission by tolling the active construction permit completion date, K45IM-D August 27, 2021 and K38NR-D August 20, 2021, until the new transmitter, antenna, and tower upgrades may be installed.

Commission letter of June 25th clearly informed Developers K38NR-D and K45IM-D are not eligible for construction permit extensions yet may submit a request for additional time to complete construction under the Commission's "tolling" rule. As suggested Developers has reviewed 47 CFR § 73.3598(b) and has been subjected to circumstances not under Developers control.

The transmitter vendor cannot at this time provide an estimate as to when delivery of the transmitter can be made. The reason for the delay in delivery is a direct result from the restarting of commerce in California. The vendor, Anywave, has received payment for the transmitter(s) and antenna(s). Please see attached Anywave letters.

Developers is making every effort to complete the authorized construction as stated within the permits before August 20, 2021 and August 27, 2021. Because of the un-know delay(s), beyond their control, Developers is requesting relief from the Commission by tolling the construction permit completion date until the new transmitter, antenna, and tower upgrades may be installed.

Sincerely,

Ernest L. Johnson,

Ernest L. Johnson, Esq., D.D.
